

Engineer

- Full Time
- Perm Position
- Competitive salary
- Benefits package

Protexin® Careers

ADM Protexin Ltd are a rapidly expanding manufacturer based in the heart of Somerset. We manufacture high quality probiotic supplements for humans and animals and seek a skilled Engineer to join our team. It's an exciting time to join the business as we continue to grow following the opening of our second onsite purpose built production facility in 2018.

If you are an experienced and knowledgeable Engineer, then this could be the role for you!

Main Responsibilities

- To assist the Engineering Manager with continuous improvement, by recommending changes that could prolong machine life, increase efficiency, reduce wastage and aid the smooth running of departments.
- Carry out Preventative Maintenance as required.
- Carry out Corrective Action as required.
- Taking responsibility for the control of the parts store, ensuring that correct parts are kept in stock to prevent and minimize downtime of machines.
- Liaising with any departments necessary to ensure the smooth running of the production facility and minimising downtime by prioritising engineering issues.
- Ensure that documentation for Corrective Action and Preventative Maintenance are filled out correctly.
- Assist with Facilities Maintenance and Development.

This is a busy hands-on role, and the ideal candidate will have experience working as an engineer within a production / manufacturing environment. Experience working in a GMP regulated facility or similar (BRC, ISO 9001, BETA NOPS) is desirable but not essential. Candidates must also have a good level of IT knowledge to operate the ERP system and ideally an interest in future technology and equipment to ensure our business continues as a state of the art manufacturer.

Standard working hours are 8.30am – 5.00pm, Monday – Friday, however flexibility is essential to support the business at peak times and conduct out of hour's maintenance / engineering operations.

Your contribution to ADM Protexin Ltd will be rewarded with a competitive salary and a range of benefits including excellent pension scheme, healthcare benefits and 25 days annual leave plus bank holidays.

To apply for this position, please forward your CV and covering letter to:
