

PROTEXIN EQUINE PREMIUM

CASE STUDY: KHARTOUM AND NIKKI MALCOLM EDITORIAL INTERVIEW DEC 2013

Jonathan Nelson, Protexin Equine Premium Director:

Khartoum, owned and ridden by Nikki Malcolm, is one of the most successful endurance horses ever. He has a 100% success rate in all 14 race rides entered and successfully completed. His accolade includes 6 race wins between 80-100kms, 3 race wins between 101-120kms and 2 wins in the top class of 121-160kms. On top of that he was National Champion in 2011 and Nikki and Khartoum were the highest ranked FEI combination in 2011.

Nikki Malcolm,

I have been very privileged to have ridden, trained and owned such a fantastic athlete. I have never known a horse with such ability, and capacity to recover.

JN: I met Nikki in 2010 at an endurance event we had sponsored in Somerset, not far from our offices. It was at this event that I introduced her to the new Protexin Equine Premium range and explained how it could help horses in their discipline.

NM: Since being introduced to Protexin I have been a regular user of various products from the range with Khartoum and believe their role in his management have made a contribution to his success. Endurance horses have to maintain excellent gut function during training and competition, and gut noise/function

is one of the regular checks at vet gates as it indicates the stress state of the horse alongside other parameters.

Acid Ease is his regular supplement with Quick Fix being used as well during periods of travel and competition. We also include Acid Ease with his fibre feeds at vet gates during competition. Recently I have really found the Recover Aid very good during his pre and post race preparation and recovery.

Many thanks to Protexin for playing a key part in making all his races a success, particularly his debut overseas where his vet sheet remained "A" perfect throughout the 120km FEI event.
