- Excellent benefits

Protexin® Careers

This is an excellent opportunity for an individual with a background in Regulatory Affairs in the Pharmaceutical industry to join a highly successful international company, producing innovative research based products of the highest quality for the veterinary, human, agriculture and equine healthcare markets.

This role will assist in all aspects of managing the compliance of a diverse range of products for various customers and relevant regulatory functions, as well as internal regulatory obligations.

Main responsibilities include

- Updating and managing our Document Management System by developing, writing and reviewing regulatory Position Papers, Policies, Standard Operating Procedures and Work Instructions on dedicated IT platforms.
- Technical lead for all product labelling requirements and associated customer and practitioner literature overview for veterinary, human, equine, agricultural and aquaculture product labels and marketing materials including relevant websites.
- Supervision of two Regulatory Affairs Assistants focused on customer management and registration requirements for veterinary, human, equine, agriculture and aquaculture products for international markets.
- Keep abreast of UK, EU and where relevant international including the USA legislation, guidelines and practices for Food Supplements, Complementary Feeds and Pharmaceutical, for products manufactured or distributed by the company and communicate this to relevant colleagues.
- Represent the company in affiliate associations.

The ideal candidate will have a degree in chemistry, biochemistry, pharmacology or similar, accompanied by at least 2 years experience in a Regulatory role (or similar). You'll need a solid scientific and legal understanding, have top analytical and problem solving skills and efficient written and oral communication skills. You'll need to be super organised and able to work to strict deadlines. People skills and the ability to network and negotiate are a must. The ability to troubleshoot complex issues and develop resolute plans that are clearly objectified, structured and achievable is essential.

To apply for this unique opportunity, please send your CV plus a covering letter detailing your suitability for the role to:
